

THE DEAN PUMP ADVANTAGE

THE DEAN BRAND IS SPECIALIZED IN PROCESS AND HIGH TEMPERATURE METALLIC PUMPS

Proven Performance

Since 1869, Dean Pump has been an industry leader in the manufacture of high performance metallic pumps. Specializing in heat transfer pumps for liquids to 850°F (455°C), Dean pumps are installed and in use around the world in petrochemical facilities, power plants, mining, pharmaceutical, and food processing industries.

Quality Assurance

Dean pumps have proven to be among the world's finest pumps manufactured. Every pressure containing Dean Pump part is hydrostatically tested. Additionally, all assembled units are hydrostatically tested to the limits of the seal, flush loop, or other pressure limiting accessories.

Mechanical Reliability & Hydraulic Efficiency

Dean pumps incorporate features which make them the most efficient process pumps available. Ongoing research and development, in response to industry requirements, provide the highest possible efficiency while improving mechanical integrity.

Made in the USA - Distributed Throughout the World!

All Dean pumps are manufactured in the United States and supported globally by our strong network of distributor and service partners.
